DETAILED ACTION

Election/Restrictions

1. Applicant's election of Group I, claims 1-5 in the reply filed on Jun. 17, 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Specification

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Takano (US 6,212,231 B1).

Regarding claim 1, Takano discloses a video processing apparatus (Fig. 1) comprising:

input means (video interface 17 of Fig. 1, col. 4, lines 28-32) for inputting video data of a macroblock unit;

storage means (the SDRAM 13 of Fig. 1, col. 3, line 65 to col. 4, line 10; col. 8, lines 44-51) for allocating addresses to said video data inputted by said input means in an ascending order and storing said video data; and

reading means (col. 8, lines 21-37) for reading out said video data stored in said storage means in the ascending order of the addresses.

Regarding claim 2, Takano also discloses the claimed conversion storage means (stream interface 23 of Fig. 1, col. 8, lines 1-14) for converting said video data read out by said reading means into the data of an address arrangement similar to that of a video image which is displayed on the basis of said video data and storing said video data.

Regarding claim 3, Takano discloses the claimed wherein said storage means has two or more banks (banks 15(1) and 15(2) disclosed from col. 4, line 58 to col. 5, line 22), switches said banks every width in the horizontal direction of a video image which is displayed on the basis of said video data, and stores said video data (banks 15(1) and 15(2) disclosed from col. 4, line 58 to col. 5, line 22).

The method claim 4 is rejected for the same reasons as discussed in apparatus claim 1 above.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Takano (US 6,212,231 B1).

Takano discloses all the claimed limitations as discussed in claim 1 above except for providing a medium for allowing a computer to execute a program.

It is noted that using microprocessor having ROM for controlling the write and read of video signal into and from memory is old and well known in the art and; therefore, Official Notice is taken.

It would have been obvious to one of ordinary skill in the art at the time of the invention to incorporate the well known microprocessor having ROM into Tanaka's system in order to accurately write and read video signal to and from SDRAM or simplify the process of writing and reading video signal to and from SDRAM.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The cited references relate to storing video signal.
